

VISWANATH KODUKULA

Director / Vice President – Data Science, AI/ML & Generative AI

Enterprise AI Strategy • Agentic AI & GenAI Platforms • Org Building • P&L and Delivery Ownership • Responsible AI Governance
Greater Pittsburgh Area, PA | (305) 546-3364 | viswanath.kodukula@gmail.com | [linkedin.com/in/viswanath-kodukula](https://www.linkedin.com/in/viswanath-kodukula)

EXECUTIVE PROFILE

Data Science and AI executive with 20+ years across data architecture, analytics, and machine learning, including 4+ years leading enterprise Generative AI and Agentic AI. Currently Co-Founder and Chief AI & Innovation Officer of an agentic AI venture while concurrently serving as Director of Data Science & Generative AI for a global technology services firm. Proven at building and leading multidisciplinary teams of data scientists, ML engineers, and architects; owning AI strategy, roadmap, budget, and delivery; and converting emerging AI capability into revenue, cost, and risk outcomes the C-suite can measure.

- **Organizational Leadership:** Built and led data science and GenAI functions and consulting practices; hired, coached, and promoted engineers and scientists; set technical standards, career frameworks, and delivery playbooks.
- **Enterprise Impact:** Delivered 50+ production AI agents across 14 industries; compressed prior-authorization appeal turnaround from 16 days to 1–2 days; reduced manual invoice processing effort 70–90%; cut LLM classification wall-clock time ~10x across 1M+ enterprise records.
- **Executive Influence:** Trusted advisor to CIO/CDO/CTO on AI strategy, build-vs-buy, platform investment, vendor selection, and Responsible AI governance — fluent from board narrative to hands-on architecture.

CORE LEADERSHIP & TECHNICAL COMPETENCIES

Leadership & Strategy: AI/ML Strategy & Roadmap • Team Building & Talent Development • P&L, Budget & Resource Planning • Executive & Board Stakeholder Management • Program & Portfolio Governance • Vendor Management • Agile Cross-Functional Delivery • Change Management • Pre-Sales & Solutioning • Mentoring

Generative & Agentic AI: Multi-Agent Orchestration (LangGraph, LangChain, CrewAI, AutoGen, PydanticAI, Google ADK) • Agentic RAG • LLM Gateway & Multi-Model Routing • Prompt & Context Engineering • Fine-Tuning (LoRA/QLoRA), Quantization, Distillation • Guardrails, Memory & Session Boundaries • A2A / MCP Tool Interoperability

Cloud & Data Platforms: Azure (OpenAI, AI Search, ML, Synapse, Databricks, Delta Lake, Cosmos DB, AKS) • AWS (Bedrock, SageMaker) • GCP (Vertex AI, BigQuery, Looker) • Snowflake • Palantir Foundry • Vector DBs (Azure AI Search, Pinecone, Weaviate, FAISS)

MLOps / LLMops & Engineering: CI/CD (GitHub Actions), Model Versioning & Registry • Evaluation Harnesses (hallucination, grounding, bias) • Observability (Langfuse, Arize) • Terraform, Helm, Docker, Kubernetes (AKS/EKS/GKE) • Microservices & Serverless • Cost / Performance Optimization

Data Science & Analytics: Python, SQL, PySpark • NLP, Deep Learning, Forecasting, Computer Vision • Statistical Modeling & Experimentation • Data Architecture & Warehousing • Power BI, Tableau, SAP BusinessObjects • Data Quality & MDM

Governance & Responsible AI: Responsible AI Standards • Model Risk Management • Bias Audits & Explainability • Regulatory Alignment (HIPAA/PII-aware design) • Metadata-Driven Access Control & RBAC • Architecture Decision Records

EXECUTIVE & LEADERSHIP EXPERIENCE

Co-Founder & Chief AI & Innovation Officer | SaiDatta Agentic

Jul 2026 – Present

Greater Pittsburgh Area, PA | Agentic AI venture — founding executive, AI vision, delivery org, and go-to-market

- Co-founded an agentic AI company and own the enterprise AI vision, product strategy, and innovation roadmap — setting the technical direction, service catalog, and commercial model from inception.
- Lead design and deployment of autonomous AI agents that complete work end to end rather than demo it; delivered 50+ production agents across 14 industries including healthcare, financial services, insurance, and manufacturing.
- Drove measurable client outcomes: prior-authorization appeal turnaround reduced from 16 days to 1–2 days, and manual invoice processing effort cut 70–90% through agentic document intelligence and human-in-the-loop workflows.
- Built the founding delivery organization — recruiting and mentoring AI engineers, data scientists, and solution architects; established the hiring bar, engineering standards, and reusable agentic accelerators; own P&L levers across pricing, staffing, cloud spend, and inference cost optimization.
- Serve as executive sponsor to client C-suite stakeholders — translating AI capability into roadmaps tied to revenue, cost, and risk, and presenting business cases to executive steering committees.
- Established Responsible AI and security guardrails as a first-class product requirement: evaluation gates, PII/PHI redaction, audit trails, and human oversight in every agent deployment.

Director of Data Science & Generative AI | KAAYATECH

Aug 2025 – Present

Concurrent leadership appointment — directs the enterprise AI/ML practice alongside founding role at SaiDatta Agentic

- Direct the data science and generative AI practice — owning capability strategy, technology standards, delivery quality, and client outcomes across concurrent enterprise engagements.
- Lead and mentor a distributed team of data scientists, ML engineers, and BI professionals; set performance objectives, run technical design reviews, and grow senior individual contributors into architect and lead roles.
- Standardized the practice-wide GenAI reference architecture — Agentic RAG, LLM gateway, evaluation harness, and LLMops tooling — cutting solution design cycle time and improving delivery predictability.
- Partner with sales leadership on solution architecture, effort estimation, SOWs, and executive proposal defense; own practice AI governance — Responsible AI standards, model risk review, data privacy alignment, and cloud cost governance across Azure, AWS, and GCP.

Lead GenAI Consultant / Data Scientist | Lam Research (via HCL Technologies)

Jan 2026 – Jun 2026

Fremont, CA (Remote) | Enterprise GenAI program for global semiconductor equipment manufacturer

- Led architecture and delivery of a production LLM classification platform (Azure OpenAI) processing 1M+ historical semiconductor support records into Azure Databricks Delta tables, with hybrid LLM + rule-based validation that eliminated hallucinated product and system entities.
- Directed multilingual intent classification across 6+ languages (Korean, Japanese, Chinese) with a 38-subtopic taxonomy spanning 200+ products and 400+ systems, cutting non-English misclassification.
- Architected high-throughput parallel processing with exponential backoff, rate-limit handling, and crash-safe row-level checkpointing — reducing classification wall-clock time ~10x and unlocking weekly refresh cadence.
- Established observability and data-quality governance — Langfuse tracing, answer-quality scoring, CCI redaction flagging, and citation-integrity validation across 1M+ Q&A pairs — with executive Power BI dashboards and automated PPTX reporting delivered across 5 global regions.

Lead Data Scientist / GenAI Solution Architect | RelPro, Inc.

Apr 2024 – Jul 2025

Remote | B2B data intelligence platform — owned GenAI architecture and data science team leadership

- Owned the cloud-agnostic GenAI architecture — Agentic RAG on Azure AI Search vectors, portable to GCP/AWS — and authored the design patterns and ADRs adopted across engineering.
- Managed and mentored a team of junior and mid-level data scientists, lifting capability in statistical modeling, LLM evaluation, storytelling, and executive communication.
- Tuned and launched the Business Summary model to production, generating 5,000+ summaries per week at 92% internal QA accuracy — a core differentiator in the customer-facing product.
- Built a data validation toolkit (schema, null-rate, outlier checks) lifting ingestion success to 99.7%; engineered a multi-threaded scraper indexing 2M pages across 1,000+ verticals.
- Designed LLM gateway patterns for multi-model access with unified APIs, rate limits, quotas, and safe fallbacks; cut production RAG p95 latency ~35% via adaptive batching and caching.
- Oversaw model governance, risk management, and Responsible AI compliance, with evaluation and observability (Arize) for model and agent reliability KPIs.
- **Innovation:** Finance Copilot on Google ADK orchestrating a multi-agent workflow (Search, Retrieve, Quant Analyze, Narrate) grounded in BigQuery/Looker — <3s time-to-insight, >90% precision on revenue segments; plus a healthcare pipeline summarizing physician-patient conversations with FHIR/EHR grounding.

Lead Data Scientist / Gen AI Architect | Tata Consultancy Services

Nov 2022 – Mar 2024

United States | Enterprise AI/ML architecture and delivery leadership across client engagements

- Designed end-to-end AI/ML architectures on Azure and Snowflake spanning ingestion, feature engineering, training, deployment, and monitoring — senior technical authority across client workstreams.
- Delivered production RAG with hybrid search and reranking; integrated agentic flows with microservices and event-driven architecture, defining guardrails and context boundaries for agent interactions.
- Implemented MLOps pipelines (GitHub Actions, Docker, Kubernetes) for CI/CD, versioning, and reproducibility, and instituted evaluation harnesses (hallucination, grounding, bias) with release gates — formalizing go/no-go criteria for production model releases.
- Mentored cross-functional teams on prompt/context engineering and multi-agent orchestration; partnered with infrastructure teams on Terraform/Helm automation and cost/performance optimization.

Lead Data Scientist | Marriott Vacations Worldwide – Miami-Fort Lauderdale, FL

Dec 2019 – Dec 2022

- Led concurrent analytics and ML projects across cross-functional teams and external vendors, owning scope, sequencing, and stakeholder alignment.
- Delivered Finance-domain machine learning and NLP solutions with Python and Power BI; applied MLOps practices for reproducible training, containerized deployment, and monitoring.
- Partnered with executive stakeholders on benefit, risk, and cost cases — converting analytics initiatives into funded programs with measurable enterprise value.

Senior Data Scientist / BI & ML Engineer | Interval International – Miami, FL

Aug 2011 – Dec 2019

- Designed and executed experiments in forecasting, NLP, and computer vision that surpassed established benchmarks; drove early enterprise adoption of Azure and AWS cognitive services.
- Architected executive revenue, KPI, and customer-experience dashboards (Complaint Tracking, Customer Service Index) for Finance, Marketing, Member Services, and call center leadership.
- Built and governed enterprise semantic layers and reporting platforms (SAP IDT/UDT, Web Intelligence, Xcelsius), setting the standards other analysts built against.

EARLY CAREER

- IT Consultant, Kforce Inc. (Mar 2009 – Jul 2011) • IT Consultant, PCB Apps (Mar 2008 – Mar 2009) • Senior Software Engineer, Satyam Computer Services (Dec 2005 – Dec 2007) • Senior Software Engineer, Caritor India / NTT Data (Apr 2004 – Dec 2005) — enterprise BI, data warehousing, and reporting delivery (Crystal Reports, SSRS, SAP BusinessObjects).

EDUCATION & CERTIFICATIONS

- **Post Graduate Program, Artificial Intelligence & Machine Learning – Business Applications** | **Postgraduate Program, Data Science & Business Analytics** — UT Austin, McCombs School of Business
- **Master of Philosophy (MPhil), Computer Science** — Periyar University, India | **MCA, Computer Science and BEd, Mathematics & Physics** — Andhra University, India
- **Certifications:** Microsoft Azure Data Scientist Associate • Microsoft Power BI Data Analyst Associate • AWS Solutions Architect – Associate • AWS Cloud Practitioner • Palantir Foundry Foundations • Certified Text Analyst
